## Introduction

More than one thousand Tardigrada species were included in the published checklist (Guidetti, R. & Bertolani, R. 2005. **Tardigrade taxonomy: an updated check list of the taxa and a list of characters for their identification.** *Zootaxa*, 845, 1–46.) plus the additions and corrections to this checklist (Degma, P. & Guidetti, R. 2007. **Notes to the current checklist of Tardigrada.** *Zootaxa*, 1579, 41–53.). For practical reasons, we have joined these two papers (without comments added to particular taxa as well as without references published in these papers) into an accurate combined version of the checklists. We incorporated all taxonomical novelties in the current edition of the Checklist even if they were published just online. Then, following the International Code of Zoological Nomenclature, we corrected the year of a taxon description in its print edition. This checklist is free for all users, but utilization of it requires the citation of the two original papers. This checklist is the platform for occasional upgrades (date of latest upgrade is in the title). The changings respect to the previous version of the checklist have yellow background.

If you also use these changes, please also cite this checklist (Degma, P. & Guidetti, R. **Actual checklist of Tardigrada species.** DOI: 10.25431/11380\_1178608. Accessed *date*).

This checklist collects the taxonomic and systematic information available in the bibliography, so the authors do not necessarily share what is reported in the articles used for the composition of this list.

Currently there are 33 families, 156159 genera, 14051464 species and 3121 additional subspecies included in the checklist.

Please write us if you find any mistake or missing data in this checklist. Your help in its improvement will be acknowledged.

## Acknowledgements

We are very grateful to Emeritus Professor Roberto Bertolani (University of Modena and Reggio Emilia, Italy) who created this list with us and helped keep it updated until its 41th edition. We thank to Professor Clark Beasley (McMurry University, Abilene, Texas, U.S.A.) for his suggestions as well as for help with improving the English in the last version of the manuscript. We also thank to Nigel Marley (University of Plymouth, U.K.), Gary Grothman (St. Mary's University, Calgary, Canada), Paulo Fontoura (University of Porto, Portugal), Harry Meyer (McNeese State University, Lake Charles, Louisiana, U.S.A.), Sandra McInnes (British Antarctic

Survey, U.K.), Erica De Milio (National University of Ireland Galway), Łukasz Kaczmarek (Adam Mickiewicz University in Poznań, Poland), Neil Redgate (Northern Highlands Ecological Research Centre, Castletown, U.K.), Myles O'Reilly (Scottish Environment Protection Agency, Holytown, U.K.), Shinta Fujimoto (Tohoku University, Aomori, Japan), Łukasz Michalczyk (Jagiellonian University, Kraków, Poland), Diane Nelson (East Tennessee State University, Johnson City, Tennessee, U.S.A.), Denis Tumanov (Saint-Petersburg State University, Russia), Jesper Guldborg Hansen (Natural History Museum of Denmark, Copenhagen, Denmark), Piotr Gąsiorek (Jagiellonian University, Kraków, Poland), Hieronymus Dastyk (Universität Hamburg, Germany), Daniel Stec (Institute of Systematics and Evolution of Animals, Polish Academy of Sciences, Kraków, Poland) and David Nicolson (ITIS, US Geological Survey, and the Smithsonian Institution NMNH, Washington, DC, USA) for their valuable comments to this checklist.

This study was partly supported by the Slovak Scientific Grant Agency (VEGA) (grant No. 1/3265/06 and 1/0294/09 to PD), by University of Modena and Reggio Emilia (50% FAR) and by Fondazione Cassa di Risparmio di Modena (MoDNA project: Morphology and DNA) to RB and RG.
